# axeaAcademy ®

A Powerful Management Tool for ICD-10, CPT, and E&M training and education, uniquely developed to support the comprehensive management of coders and coding teams

FEATURES & BENEFITS

Axea Academy provides a host of features and benefits that support an efficient, enjoyable learning process, including:

- Day-to-day modules cover topics related to on-the-job work,
- Self-paced lessons that are user friendly and easy to navigate,
- Content that is developed and delivered by experienced, credentialed instructors,
- An easy to complete education track for annual regulation updates,
- A handy dashboard view, which enables users to track course progress from self-evaluation and time with your educator to training activities and applying your knowledge,
- Train and learn from home – or anywhere – without traveling or attending live classes,
- CEU certificates of completion available for submission to AHIMA and AAPC, and
- For managers, access to a library of standard reports and the ability to configure and tailor reports using custom filters to align with your training goals.

Coder Track

Looking to advance ICD-10 knowledge? Coder Track courses are designed for coding professionals to expand on current knowledge. The CM and CPT courses are based on book chapters, with struc-tured objectives and specific coding guidelines, and pertinent clinical concepts; while the PCS courses are intuitively divided. All Coder Track courses provide a variety of teaching methods using visual, audio and interactive learning.

▶ Self-Assessment: designed to help the learner evaluate his/her level of understanding of ICD-10

▶ Time with Your Educator: an audio-visual presentation of the course material for ICD-10/CPT where no score is assigned

▶ Interactive Activities: learning exercises designed to reinforce taught concepts, accomplished through a quiz scenario providing detailed feedback to the learner

▶ Apply Your Knowledge: a scored final exam

▶ Optional course feedback survey

Toolboxes

The toolboxes are resources that give the coder and provider a detailed look at the guidelines specific for improving documentation and coding within ICD-10 CM, ICD-10 PCS, and CPT - Includes coding guidelines as well as provider documentation tips and additional references.

CODER TOOLBOX

The Coder Toolboxes include numerous learning tools as an adjunct to the ICD-10 CM, and ICD-10 PCS, and CPT code systems. These additional resources aid in the learning process, and are all down-loadable.

CODER TOOLBOX: CM
— ICD-10 Coding Guide for each ICD-10 CM chapter
— Case Study for each ICD-10 chapter

CODER TOOLBOX: PCS
— Character Meaning by PCS Section
— How to locate a PCS Code
— How to Code from an Operative Report
— Detachment Qualifier Definitions
— Device Guide
— Spinal Fusion Guide

CODER TOOLBOX: CPT
— CPT Common Definitions
— CPT Suffixes, Directions and Symbols
— CPT Coding from OP Notes
— 10 Case Studies

PHYSICIAN TOOLBOX

Physician tool guides provide specialty-specific ICD-10 documentation guidance based on the code set, used for physician education specific to ICD-10:
— Physician ICD-10 CM Guides, by specialty
— Physician ICD-10 PCS Guides, by specialty
— PCS General Guidance

CourseCatalog

ICD-10 CM

Course 001: Infectious Diseases
Code sets for infectious and parasitic diseases, guidelines for certain infectious conditions, and detailed content for manifestation and combination coding

Course 002: Neoplasms
Code sets for neoplasms, guidelines for neoplasm code assignment, and detailed content for the different types of neoplasms

Course 003: Blood
Code sets for blood and blood forming organs, and detailed content and code specification for anemia and other blood conditions

Course 004: Endocrine Diseases
Code sets for endocrine, nutritional, and metabolic diseases, guidelines for diabetes and its impact on diagnosis code selection, and detailed content for nutritional and metabolic disorders

Course 005 Mental Disorders
Code sets for mental, behavioral, and neurodevelopmental disorders, guidelines for pain and substance use, and detailed content and code specification for mental, behavioral and neurodevelopmental disorders

Course 006: Nervous System
Nervous system code sets, guidelines for hemiplegia and hemiparesis and detailed content for conditions and diseases of the nervous system

Course 007: Eye and Adnexa
Code sets for diseases of the eye and adnexa, guidelines for glaucoma and detailed content for specific diseases of the eye

Course 008: Ear and Mastoid
Code sets for diseases of the ear and mastoid pro-cess, chapter specific diagnosis codes and detailed content for ear and acoustic nerve disorders

Course 009: Circulatory System
Circulatory system code sets, chapter specific circulatory guidelines and detailed content for circulatory disorders

Course 010: Respiratory System
Code sets for diseases of the respiratory system, chapter specific respiratory guidelines, and detailed content for respiratory disorders

Course 011: Digestive System
Code sets for diseases of the digestive system, chapter specific diagnosis codes and detailed content for commonly coded digestive conditions

Course 012: Skin and Subcutaneous
Skin and subcutaneous code sets, chapter specific guidelines for pressure and non-pressure ulcers, and detailed content for ulcers and other skin diseases

Course 013: Musculoskeletal System
Code sets for musculoskeletal disorders, chapter specific musculoskeletal guidelines, providing detailed content for fractures and other musculoskeletal disorders

Course 014: Genitourinary System
Code sets for the genitourinary system, and detailed content and code specification for diseases and conditions of the Genitourinary System

Course 015: Pregnancy, childbirth, and puerperium code sets, chapter specific guidelines for pregnancy, labor and delivery, and detailed content and code specification for diseases and conditions within the chapter

Course 016: Perinatal Period
Code sets for the perinatal period, chapter specific perinatal guidelines and has detailed content and code specification for perinatal conditions and disorders

Course 017: Congenital Malformations
Code sets for congenital malformations, chapter-specific guidelines for congenital conditions and detailed content and code specifications for congenital disorders

Course 018: Symptoms, Signs
Code sets for symptoms, signs and abnormal findings, chapter-specific guidelines and detailed chapter content for abnormal clinical and laboratory findings

Course 019: Injuries and Poisonings
Code sets for injuries, poisonings, and other external causes, chapter-specific guidelines and detailed content for injuries, poisonings, and other external causes

Course 020: External Causes of Morbidity
Code sets for external causes of morbidity, guidelines and detailed content and code specification for external causes

Course 021: Factors of Health Status
Code sets for factors influencing health & health services, chapter-specific guidelines and detailed content and code specification for factors influencing health status and health services

ICD-10 PCS

Courses 024, 025 and 026 provide clinical and mechanical information on common inpatient procedures. All 31 root operations are defined in detail with surgical examples and exercises within the three courses.

Course 022: Introductory Course on ICD-10 and the PCS Structure
Introductory course that outlines the history of ICD-10-PCS, the PCS structure, table organization, key attributes, characteristics, and definitions.

Course 023: Medical and Surgical Coding Guidelines
Covers detailed medical and surgical coding guidelines specific to body system, body parts and approach. The body parts section addresses the following: branches, bilateral values, coronary arteries, joint structures, tissue overlying a joint, fingers and toes, and gastroin¬testinal; including the definitions and coding guidelines for approach. Components of the approach section addresses: access location, method and type of instrumentation.

Course 024: 10 Root Operations Covered:
— Destruction — Detachment — Division
— Drainage — Excision — Extirpation
— Extraction — Fragmentation — Release
— Resection

Course 025: 12 Root Operations Covered:
— Change — Insertion — Inspection — Map
— Reattachment — Removal — Replacement
— Reposition — Revision — Supplement
— Transfer — Transplantation

Course 026: 9 Root Operations Covered:
— Alteration — Bypass — Control — Creation
— Dilation — Fusion — Occlusion — Repair
— Restriction

Course 027: Medical and Surgical Procedures
Covers information specific to the medical and surgical procedures related to nine additional sections of ICD-10-PCS and the six ancillary sections. This includes general information, body system, root operation, code components (body part, approach, device, qualifier), and coding tips.

Course 028: CM and PCS Concepts - Basic ICD-10
Applies practical ICD-10 coding experience by utilizing concepts learned in CM and PCS courses to operative notes.

CPT

Course 029: Introduction to CPT
An overview of current procedural terminology coding, which includes an outline and clear definition of current procedural terminology, and clarification of how the CPT manual should be used in order to ensure the quality and accuracy of coding.

Course 030: Reimbursement Basic
A review of third-party reimbursement, Medicare's outpatient prospective payment system, and correct coding initiatives. This course also provides detail on reimbursement for outpatient services, illustrating how correct coding initiatives impact coding.

Course 031: Modifiers
An in-depth review of commonly used modifiers for hospital outpatient use and physician services.

Course 032: Evaluation and Management
Examines current procedural terminology for evaluation and management services, providing detailed category content for E/M services, covering documentation guidelines and CPT chapter-specific definitions.

Course 033: Integumentary System
- Excisional debridement of the skin and subcutaneous tissue
- Excisions of benign and malignant lesions
- Burns
- Breast mastectomy procedures

Course 034: Musculoskeletal System
- Arthrocentesis
- Fracture care
- Bunionectomy
- Arthroscopic procedures on the knee and shoulder

Course 035: Respiratory System
- Sinus endoscopy
- Laryngoscopy
- Bronchoscopy
- Thoracentesis

Course 036: Cardiovascular System
- Implantable cardiac devices
- Cardiac catheter placements
- Interventions in the coronary arteries
- Central venous catheter placements

Course 037: Digestive System
- Tonsillectomy and adenoidectomy
- Esophagoduodenoscopy
- Colonoscopy
- Hernia repairs

Course 038: Urinary System
- Foley catheter insertion
- Cystourethroscopy with fulguration of bladder tumors
- Cystourethroscopy with lithotripsy and indwelling ureteral stent insertion

Course 039: Male Genital System
- Circumcision
- Hydrocele repairs
- Lipoma excision

Course 040: Female Genital and Endocrine Systems
- Conization
- Hysterectomy, dilation & curettage
- Colporrhaphy, abortion treatment, and thyroidectomy

Course 041: Nervous System
- Nerve block
- Neuroplasty
- Neurorrhaphy
- Myelography
- Decompression
- Spinal tap

Course 042: Eye and Auditory System
- Foreign body removal of the eye
- Lens procedures for cataract extractions
- Vitrectomy performed to treat retinal detachments
- Myringotomy/tympanoplasty

COMPREHENSIVE FINAL EXAMS — CM, PCS, CPT

Axea Academy™ includes timed exams consisting of questions developed to assess the learner's comprehensive knowledge of CM, PCS and CPT concepts covered in the coursework. The questions are a mix of true/false and multiple choice, based on knowledge and theory as well as coding applications.

Axea Academy™ courses are AHIMA and AAPC certified for Continuing Education Units (CEU's)

The right tools. The right team.

Developed by Experts

With more than 20 years of hands-on health information management experience and a comprehensive understanding of revenue cycle business challenges, the Axea Academy™ course material was strategically developed by our AHIMA-approved ICD-10 educators, certified professional coders, and certified coding specialists.

Healthcare Professionals' Choice

Healthcare professionals choose Axea Academy™ for ICD-10, CPT, and E&M training because the platform is uniquely developed to support comprehensive management of coders and coding teams. It provides managers with an online education track of annual regulation updates, real-time reporting for consistent evaluations, and the ability to cross-train coders and provide specialty service line training — support documents, such as case studies and coding guides are accessible, and trouble areas are easily identified enabling a more targeted educational initiative.

Tailored Approach

Axea Academy's learning approach accommodates diverse learning styles, using a variety of interactive teaching tools that ensure effective knowledge transfer and on-the-job application. User friendly and easy to navigate, the platform provides coders with the ability to upgrade his/her skills through hands-on experience of ICD-10-CM, ICD-10-PCS, and CPT, and earn CEU credits with AHIMA and AAPC accredited courses.
